Asset Manager

Asset Manager is an enterprise level collaborative tool to manage compliance information on plant equipment. Asset Manager can function as a stand alone application or work in conjunction with other asset management systems (AMS). As a stand alone application, Asset Manager provides a system of organized information on assets and their records required to be maintained by regulations. It includes an asset registration and revision control system, user configurable Metadata fields and a search engine for quick location and utilization of your asset information.

In the presence of a third party AMS application, Asset Manager functions as a compliance Add-On module to filter and organize your asset compliance records. It provides additional Metadata fields for asset searches and the ability to multi-reference the same asset when needed for different regulatory purposes. This minimizes the need to store duplicate asset information in numerous locations within your file structure system. Asset Manager can be used to demonstrate compliance with regulations like OSHA, DOT, EPA, PSM, RMP, SPCC, et al. Asset Manager is versatile and user friendly with user configurable tools for asset types, sub-types, status and Metadata.

Features:

Highlights

- Built for multiple plant/location collaboration
- Works as a stand alone application
- Works as an Add-on module to existing software
- Solid ASPX (Dot Net) platform
- SQL Database
- Designed by End Users for End Users
- Pre-loaded with over 50 metadata fields

Unlimited Asset Types

- Piping
- Rotating Equipment
- Vessels
- Tanks
- Relief Systems
- Instrumentation and Controls
- Vehicles
- Infrastructure, buildings, structures and platforms

Application Security

- User configurable access permissions
- Inter-Plant access configurable

Add-on Module For

- EMPRV
- Maximo

Search Engine

- Powerful search engine
- Locate Assets with over 50 Metadata fields

Reports

- Versatile report generator
- Asset reports by metadata
- Reports by chemical
- Reports by regulation

Easy To Use

- Works with any Browser
- No ActiveX components used
- No special software needed
- We'll install the Software on your server
- We'll do the training
- We'll do the technical support
- We'll maintain the software

Easy Access To Asset Information

- Applicable regulations
- Asset chemicals
- Vendor information
- Inspections, calibrations, LDARs, maintenance
- Safe Work Practices
- Operating procedures
- Process information
- Drawings

User Configurable

- User configurable Metadata fields
- Look-up libraries reduce errors

Document Locations

- On a web server folder
- In a common shared LAN folder
- In another document management application
- An internet URL

Platforms and Interfaces

- Built on Microsoft's Dot Net framework
- Microsoft SQL Database
- Microsoft Access
- Microsoft Crystal and Web Reports
- Microsoft Visio and Excel
