

Setup Regulation Manager

Setup Regulation Manager is an enterprise level collaborative tool to manage regulatory compliance information including building codes, OSHA safe work practices, Code of Federal Regulations, EPA Regulations, ASME codes, ANSI codes, NFPA codes, state regulations and local ordinances. Compliance to regulatory and your safe work practices and policies is mandatory. Regulation Manager tracks this information and provides links to the source document. Used in conjunction with

Document Manager and MOC Manager, Regulation Manager can assess change impacts and demonstrate compliance to any regulation, code, quality standard or company policy. Regulation Manager is versatile and user friendly with user configurable look-up lists. Works with any browser. No ActiveX objects used.

Features:

Manages Regulations

- Manages any regulation, code or standard
- Links to source document or URL
- Link to MOC for revision impact

Highlights

- Built for multiple plant/location collaboration
- Works as a stand alone application
- Works as an Add-on module to existing software
- Solid ASPX (Dot Net) platform
- SQL Database
- Designed by end users for end users

Regulations

- OSHA Safe Work Practices
- Code of Federal Regulations
- ASME/ANSI/NFPA Codes
- Building Codes
- Quality Standards
- Your Policies and Procedures

Application Security

- User configurable access permissions
- Inter-Plant access configurable

Search Engine

- Powerful search engine
- Locate regulations by key word

Add-on Module For

- EMPRV
- Maximo
- Stellant
- Documentum
- Citadon

Reports

- Versatile Report Generator
- Summary and Detail Reports
- Changed Regulation Report

Easy To Use

- Works with any Browser
- No ActiveX components used
- No special software needed
- We'll install the Software on your server
- We'll do the training
- We'll do the technical support
- We'll maintain the software

Features

- Web Collaborative Environment
- Library updates with regulation maintenance contract
- Hyperlink to regulation source
- Source library available to installed modules

User Configurable

- User configurable Look-up Lists
- User configurable libraries reduce errors

Document Locations

- On a file server
- In a common shared LAN folder
- In another document management application
- An internet URL

Platforms and Interfaces

- Built on Microsoft's Dot Net framework
- Microsoft SQL Database
- Microsoft Access
- Microsoft Crystal and Web Reports
- Microsoft Visio and Excel
